NOTES: 1. Use Total Static Pressure column that will overcome total system resistance. Approximate pressure drop for component and accessory items: burner 1/2, filter (dirty) 1/4, intake hood 1/8, birdscreen 1/8, discharge louver 1/4". Damper resistance may be ignored.

Standard Equipment

General:

Horizontal unit with choice of HR-1 or HR-2 blower discharge.

Housing:

Heavy gauge aluminized steel, painted exterior casing with heat resistant enamel finish; four lifting lugs.

Burner:

Direct-fired line burner with direct spark for natural gas at inlet pressure from 4 oz. to 1 PSIG. Up to 22:1 turndown ratio.

Blowers:

Centrifugal DWDI forward curved fan(s) with one piece blower shaft and self aligning, 200,000 hour greaseable pillowblock ball bearings. Wheels are statically and dynamically balanced. Adjustable drives through 10 HP.

Premium Energy Efficient Motors:

T-frame, ODP prelubricated ball bearing type for all standard voltages.

Base Controls - Factory Wired & Flame Tested:

- Main gas shut-off valve.
- Main gas pressure regulators
- Motorized electric safety shut-off valve.

- Electronic modulating gas valve with discharge air controller and temperature selector dial.
- Motor Starter
- Control Transformer.
- High temperature limit switch.
- Air flow switch. Max and Min.
- Automatic mild weather burner lockout.
- Ignition transformer.
- Electronic flame safeguard system.
- NEMA 1 control box.
- Remote control station with switches and indicating lights.
- Direct Spark Ignition

Options and Accessories

Components:

- Unit weatherproofing including weatherproof service enclosure.
- Inlet or discharge shut-off dampers with motor and end switch (discharge damper recommended for outdoor units).
- Weatherhood with intake birdscreen.
- Filter section less filters.
- Discharge louvers, horizontal or vertical or both for double deflection.
- Vibration Isolators.

- Roof curb & curb adapter frame (for use with weatherproof unit).
- 2" pleated filters or 2" cleanable filters available.

Burners:

Propane or propane standby (LU-112,115 only).

Gas and Electrical Controls:

- FM or IRI approved controls.
- High gas pressure regulator—1 to 60 PSIG.
- Ultra violet flame sensor.
- Low outlet temperature shut-off.
- Gas Pilot Ignition

- Blocked intake switch and light.
- Fused disconnect switch.
- Circuit analyzer with lights.
- 2 position over-riding room thermostat for basic systems.
- Electronic modulating room control includes discharge air monitor and field mounted space temperature selector and sensor.
- Vertical unit blower arrangements with 24" support legs.
- Signal Conditioner to accept 4-20 MA or 0-10VDC Signal for gas valve modulation.

MODEL DESIGNATION

LU—XXX-X-XXX

LU Blower Model
112 thru 218

Air Volume:
SCFM/1000

Heating Capacity:
MBH Input
